Speaker Introduction (Short Version):

Carolle Vallée is Procurement Director at Tillion Data Centers, bringing over 15 years of international experience managing procurement for complex, mission-critical construction and data center projects. She specializes in contract strategy, supplier engagement, and the execution of multimillion-euro programs, with additional expertise in resolving construction-contract disputes through arbitration, mediation, and other structured dispute-resolution processes.

Complete Biography (Full Version):

Carolle Vallée

Procurement Director, Tillion | International Procurement & Contract Strategy Leader

Carolle Vallée is an accomplished procurement and contract-management leader with more than 15–17 years of experience delivering large-scale, mission-critical infrastructure projects across the construction, transport, telecommunications, and data center sectors. At Tillion Data Centers, Carolle serves as **Procurement Director**, where she leads global procurement strategy for the company's hyperscale developments — overseeing supplier engagement, contract architecture, and commercial execution. Her work ensures that Tillion's multimillion-euro infrastructure programs are delivered efficiently, competitively, and with the operational resilience required in the digital-infrastructure sector.

Before joining Tillion, Carolle built a significant international track record across complex, high-value construction and technology environments. Her expertise spans the entire procurement lifecycle — from strategic sourcing and tendering to negotiation, contract administration, and performance management. She has worked extensively with cross-border contract frameworks, including **FIDIC, NEC, JCT**, and French civil-law structures, enabling her to manage multinational project delivery with confidence and precision.

In addition to her operational leadership, Carolle is a **Member of the Chartered Institute of Arbitrators (MCI Arb)**, where her work centers specifically on **construction-contract disputes**. She applies her expertise in arbitration, mediation, adjudication, and other dispute-resolution mechanisms to resolve procurement-related conflicts, contract-performance issues, and cross-functional stakeholder challenges within the built-environment and infrastructure sectors.

Throughout her career, Carolle has been recognized for her ability to build resilient supply chains, establish strong commercial governance, and guide large-scale infrastructure delivery with clarity and rigor. Her leadership plays a central role in supporting Tillion's growth as it expands its next-generation hyperscale footprint across Europe.
